Retractable Gates

Britannia retractable gates are manufactured to meet the unique security requirement of the customer and the insurance standards. The gates are constructed from high quality steel, providing a strong physical deterrent. The design of the retractable gate system is aesthetically pleasing, whilst a 15% stacking width achieves almost total invisibility when open. All systems are easy to operate and virtually maintenance free.

Fencing/Electrical Fencing

Here at Britannia security & Maintenance we offer a wide range of security fencing and railings to provide a high level of perimeter security to your site. Included in our range is palisade fencing, Mesh fencing, steel railings etc. Whatever your site requirements are, the team at Britannia will be able to suggest to right security fencing for you.

PALISADE FENCING -

With steel spikes and an intimidating appearance, Palisade Fencing is a popular choice of security fencing for industrial and commercial sites across the UK. Made from high quality galvanised steel (meeting BS EN ISO 1461:2009 standards) and cold rolled during it's manufacture, Palisade is both lighter in weight and incredibly strong.

MESH FENCING -

Mesh Fencing is a strong and long-lasting security fencing solution which is supplied with a powder coated finish to further increase resilience. Another key benefit to using Mesh Fencing is that apertures between the wire mesh allow CCTV footage through the fencing system. With a choice of 358 Prison Mesh, 'V' Mesh and 656/868 Twin Mesh, there is always a solution to your steel fencing requirements.

Electric Fencing-

Railing systems are ideal for locations which require a low to medium level of security and where attractive boundary demarcation is needed. With a safe and stylish design, Railings are most suitable for domestic locations, as well as public areas such as parks, public gardens, commercial businesses and housing developments. Here at First Fence, we strive to meet the needs of all our customers, which is why we offer both Standard steel Railings and Self-Raking steel Railings.

Ramp Posts + Bollards

Britannia Anti Ram Posts are manufactured to meet the security requirement of the customer and the Insurers. The posts are constructed from high quality steel, providing a strong physical deterrent with the option of fixed, removable posts or barrier systems.

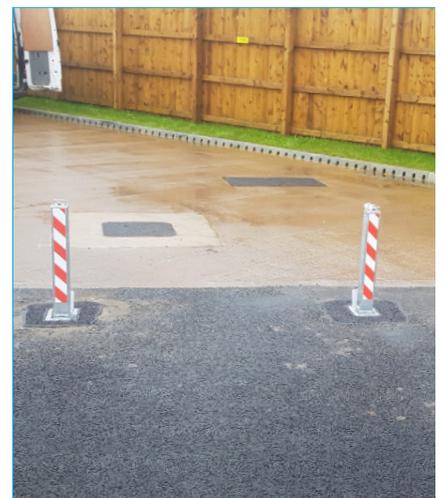

The design of the system is aesthetically pleasing and systems are easy to operate and virtually maintenance free.

ANTI-RAM POSTS - SPECS

- 1200mm high x 100 x 100 x 6mm x hollow box section post
- 300mm deep box section ground socket with hinged lid / locking asp plate

Servicing

Here at Britannia Security and Maintenance we offer Annual & Biannual service contracts for roller shutter doors to comply with the latest in HSE making it a legal requirement for your roller shutters to be serviced at least once a year.

As well as being a legal requirement, having your roller shutter doors serviced has a wide range of benefits both from a financial & safety point of view.

WHY YOU REQUIRE A SERVICE ?

Roller shutters are operated and used on a daily/ weekly basis, it is inevitable that they will become damaged over time. Servicing on a bi-annual/annual basis helps to ensure your shutters run smoothly and have a long life, spotting problems early and saving you from expensive repairs.

WHAT WE OFFER

With over 30 years in the industry we can offer a bi- annual servicing programm whereby our qualified door engineers will provide a full service on your roller shutter, provide a written report and history on the doors and make reccomendations to get your doors compliant with the latest health and safety legislation.

CURRENT LEGAL REQUIREMENTS

It is now stipulated within the Machinery Directive, European Standard EN12341 to 1:2003 that all types of manually and power operated doors are be subject to a controlled regular maintenance and service contract

Contact our office staff now to discuss your security needs:

Tel: 0800 137 683

or

Email: enquiries@britanniasecuritygroup.com

Current Regulation

Due to HSE regulation 18, all industrial doors and shutters should be inspected & maintained regularly.

The following pieces of legislation are particularly relevant when considering your legal responsibilities with regard to maintenance of industrial doors. These regulations are binding on the employer or occupier of a building or premises who have a duty to safeguard the health and safety of employees and other persons on or about the premises. Industrial Door Legal Requirements include:

Regulation 5 of the Workplace (Health, Safety and Welfare) Regulations 1992

Extract: "The equipment devices and systems to which this regulation applies shall be subject to a suitable schedule of maintenance."

This applies to all types of roller shutter doors whether manual or electrical operation.

Regulation 5 of the Provision and Use of Work Equipment Regulations 1998 (PUWER)

Maintenance

5.— (1) Legal requirements dictate that every employer shall ensure that work equipment is maintained in an efficient state, in efficient working order and in good repair.

(2) Every employer shall ensure that where any machinery has a maintenance log, the log is kept up to date.

Extract: "Where necessary in order to safeguard the safety of relevant persons. The responsible person must ensure that the premises and any facilities, equipment and devices provided are subject to a suitable system of maintenance and are maintained in an efficient state and in efficient working order and in good repair."

Rentals

Britannia Britannia security & Maintenance are one of the UK's only manufacturer and supplier of security equipment for your premises who offer our customers a roller shutter rental scheme. Our scheme gives you the opportunity to rent roller shutters, fencing & much more without the upfront costs normally seen with premise security equipment installations.

WHY RENT?

- **NO CAPITAL INVESTMENT**
Renting roller shutters & security equipment allows you to meet the security demands of your business without significant up- front costs.
- **COST EFFICIENCY**
Spare Capital can be invested in stock and turned into additional profit rather than sitting in your security equipment.
- **TRANSPARENT COSTS**
All our shutters are rented out with a transparent breakdown of the costs set out in a clear structure.
- **TAX DEDUCTIBLE**
As the rental of equipment is a tax deductible expense allowing you to write off the cost against your corporation tax.

WHAT CAN YOU RENT?

ROLLER SHUTTERS

- Industrial
- Commercial
- Domestic

ELECTRIC FENCE SYSTEMS
